Hazard Lions Club To Present Broadway Varieties Of 1958, Friday

Top TV variety and circus acts will be presented here Friday in two shows by the Hazard Lions Clubs with the proceeds going for the city's recreation fund.

Booked for a show at 2 p.m. and one at 7:30 at the Hazard Memorial Gym is the Forman Brothers "Broadway Varieties of 1958," a star-studded parade of talent including acts from the Steve Allen show, seen locally on television every Sunday night.

One of the featured acts with the show will be the versatile team of Ward Hall and Leonardo who combine their many talents to present acts of skill, comedy and thrills.

Ward gets the show underway with the unbridled parody in the act, a dummy who acts quite smart. Concluding several minutes of this fun, ventriloquist Ward and Perky sing a duet which will leave you in gales of laughter.

63 Graduate From Dilce

Sixty-three seniors of Dilce Combs Memorial High School were graduated in exercises held at the school, Friday night.

Principal speaker was Dr. J. M. Boswell, president Cumberland College. The invocation was given by the Rev. Sam Combs.

Senior awards were presented to: Philip Brashear, valedictorian; Costell Benning, salutatorian; Jean Hamilton, English; Philip Brashear, mathematics; Betty Jean Smith, science; Betty Ashworth and Wilma Cornett, commerce; Jackie Goodson and Lucille Fields, citizenship; Nancy Reynolds, dramatics; and Philip Brashear, activities.

Presentation of diplomas was by Mr. Dreyfus Brashear representing the County Board of Education.

Graduates
Graduating seniors were: Betty Ashworth, Dennis Adams, Costello Benning, Robert Brashear, Vickie Brashear, Philip Brashear, Richard Brashear, Joe Barnett, Janet Brewer, Justin Branson, Gerald Beatty, Fredia Caudill, Joy Caudill, Kenneth Combs, Tommy Combs, Marvella Combs, Phyllis Combs, Lucille Combs, Norma Grace Combs, Ercia Fay Combs, Fredricka Combs, Glenn Cornett, Janice Cornett, Wilma Cornett, Lowell Cornett, Jesse Cornett, Betty Cornett, Morean Cole; Thelma Compkis, Ronnie Crutcher, Shelby Davis, Billy Dixon, Charles Duncin, Jacquelin Epperson, Judy Ellington, Lucille Fields, Lewis Garrison, Clara Grey, Delores Grimes, William H. Griffith, Audrey Garrison, Barbara Haddix, Jean Hamilton, Bill Hart, Alma Halcomb, Clara Hall, Carl Lawson, Mona Gail Kilburn, Don McIntosh, Joyce Millard, Georgia Gail Watts, Don Garrison, Elizabeth Branson, Freddie Madden, Walter Perkins, Elizabeth Pritchard, America Jo Strong, Bruce Stewart, Wyonna Smith, Anna Lee Wooten, Loretta Roark, Jerry Spencer and Edith Ann Cornett.

Herald Adds Home Plan Feature Today

A new feature will be found in today's Hazard Herald. This paper takes pleasure in introducing on its "HomOgraf" home plans in conjunction with General Features, Inc. This home plan service is added by the Herald in recognition of the recent upswing here in home construction.

HomOgraf plans are available to use you through a coupon included in the article.

The HomOgraf home designs are not the products of an individual designer's imagination. They are not photographs of other people's homes or reprints of designs which have been created for individual clients.

Each and every one of the hundreds of HomOgraf home designs is a custom-drawn plan which has been especially prepared by the HomOgraf organization to solve the home planning problems of average families with average incomes in every part of the United States and Canada.

The home design plans will appear in the Herald once a week.

Florida Vacation Free

Florida Vacation—New Prize For Herald Correspondents

Write from your community and win a week's paid vacation in Florida!

That's right, folks! A Florida vacation for two at the fabulous Sarasota Springs Hotel will be the first prize in the second annual Hazard Herald Correspondents' Contest.

The contest, open to writers from rural communities in Perry County only, begins June 15. Second prize in the contest will be a week's vacation for two at one of the Kentucky State parks.

Announcement and details of the contest were made this morning by Mr. and Mrs. W. P. Nolan, Herald publishers.

This is the second consecutive year the contest has been conducted by the Herald. Last year first prize was a vacation at a Kentucky State park; there was no second prize. The contest winner for last year was Charles Mooney, writer of Leatherwood Locals and a regular correspondent for the Herald.

This year's contest is open to rural correspondents only, the same as last year. Rules remain the same:

1. Only one correspondent from each community will be permitted to enter.

2. Correspondents will be judged on the

extent of their news coverage; and regularity of reporting. Writing ability does not enter into the judging, since the Herald staff can edit and rewrite copy.

Persons who desire to enter the contest should contact the Herald no later than June 15. Correspondents already writing for the newspaper are automatically entered unless they request that they be withdrawn. No entries will be permitted from communities already represented in the Herald by a regular correspondent.

The success of last year's contest was indicated by Mrs. Nolan this morning in a statement when she said:

"From 8 rural correspondents this time last year, the Herald's rural correspondent staff has grown to 18. We, of course, are gratified to see our rural communities taking an interest in the paper and are anxious to see every hamlet, cross-road community and village in Perry County represented in the Herald pages."

Mrs. Nolan noted that little training is needed to be a correspondents. Housewives, ministers, teachers, postmasters, and retired persons quite often find writing as a correspondent a pleasant hobby, she continued.

In Lions Club Revue

One of the acts to be seen at the Lion's Club revue here Friday will be the western-hillbilly show to be put on by the two performers above. Student admission is 50 cents; adults, \$1.

\$17,000 Paid Perry Farmers

During the year 1957, farmers in Perry county earned \$17,657.14 by carrying out needed conservation practices on their farms, according to Geen Brashear, ASC chairman.

Twelve percent of the funds were earned by farmers in carrying out pasture practices which included establishing permanent vegetative cover for soil protection or as a needed land-use adjustment; improvement of an established vegetative cover for soil or watershed protection and liming farmland to permit the use of legumes and grasses for soil improvement and protection.

The other 88 per cent was used in soil and water conserving practices such as constructing grassland ponds as a means of protecting vegetative cover, drainage practices and forestry practices.

With ACP assistance, 2.99 acres of new pastures were

used in soil and water conserving practices such as constructing grassland ponds as a means of protecting vegetative cover, drainage practices and forestry practices.

Fugate said the still had been under observation for the past week. Mash was found near the still; the worm was missing.

The still was found on Scalam Creek.

See FARMERS, P. 8

Bar Association Honors Attorney For Long Service

A Hazard attorney and former circuit judge, S. M. Ward, has been awarded a citation for 50 years of service in the legal profession.

Mr. Ward was honored last week with the award during the annual Kentucky State Bar Association convention.

The award notes: "The recognition of fifty years or more of honorable service at the Bar of Kentucky and continued interest in the advancement of the profession of law as a member of the Kentucky State Bar Association."

"He has set an inspiring example of devotion and fidelity to the duties and obligations of an attorney and counselor at law, of leadership and unselfish participation in the public affairs of his community, state and nation, and of those commendable personal qualities that characterize those who best exemplify the high ideals of the profession of the Bar as officers of the courts in the administration of justice."

C. H. Combs, 62, Dies At Hospital; Funeral Held

The funeral for C. H. Combs, 62, prominent Hazard merchant-broker, was held yesterday afternoon at the First Christian Church with the Rev. L. Tipton Carroll officiating.

Burial was in the Cornett Hill Cemetery. A native of Knott County, Mr. Combs died at the Mt. Mary Hospital at 2 a.m. Friday, of a heart condition. He had been admitted earlier the same day.

Mr. Combs was a member of the Hazard Lions Club, the American Legion, and a veteran of World War I. At one time or another, he had held and served in every capacity with the local American Legion post.

He was also a correspondent for the Lexington Herald and Leader, and prior to the flood wrote regularly for the Hazard Herald.

He is survived by his wife, Mrs. Marie Ellen Combs, Hazard, two sons, Maj. Watson G. Combs, Ft. Sam Houston, Tex., and Dr. Clarence M. Combs, Public Health Service, Puerto Rico; two brothers, Ira Combs and Brax Combs, Sassafras, and four sisters, Miss Delta Combs and Mrs. Ama Bowling, both of Sassafras, Mrs. Rettie Cornett, Vico, and Mrs. Effie Saor, Jacksonville, Fla. Engle Funeral Home was in charge.

L'wood, Hazard Students Win D. A. R. Awards

A student from Leatherwood High School and one from Hazard High School have won scholarships awarded by the Hazard Chapter of the Daughters of the American Revolution.

Winners of the two annual scholarships, valued at \$100 each, are Geneva Couch, Leatherwood High School, and Dianne Robinson, Hazard High School.

The money is made available by the local D.A.R. through sales of the organization's book, "History of Perry County."

Announcement of the awards was made today by Mrs. Dewey Daniel, regent, following a chapter meeting here, Saturday.

Requirements for the scholarship are the need for financial assistance, desire to go to college, and the qualifications of loyalty, patriotism and dependability. Mrs. Daniel noted.

Car Dealers Plan "Auto Buy"

Wanna new or used car or truck? Well the opportunity to buy one at "You Auto Buy Now" prices is gonna be made available to Perry County shoppers starting this weekend.

Hazard and Walkertown car and truck dealers open their mammoth "You Auto Buy Now" selling campaign this Saturday May 17, at the By-Pass Parking lot with a one day sale there that will carry over to the individual garages the following week.

Plans for the campaign were launched here last week by the various garages during a series of meetings.

Participating will be Baker Buick Co., Gene Baker Ford and Mercury, Lee Crutchfield Chevrolet and Cadillac, Colwell Motors Dodge and Plymouth, Davidson Motor Co. Pontiac and International Harvester, Fallon's DeSoto and Plymouth, Faulkner's Oldsmobile and Rambler, and Seale Motor Co., Chrysler and Plymouth.

The "Auto Buy Now" sales campaign, launched by the motor industry recently, is presently sweeping the nation with fabulous results.

Here, the campaign will feature eight prizes to be given away every hour and refreshments at the By-Pass lot. Dealers will set up their own booths on two levels of the lot for Saturday's sales marathon.

Also planned are banners to be strung up at either end of the town. Local car dealers will be displaying 5 each of their products including new and used cars and trucks.

The sale will continue throughout Saturday at the By Pass, Monday, May 19, thru Saturday, May 24, dealers will hold the campaign at their own garages.

Coal Man Found Dead

A Perry County mine superintendent was found dead this morning in his car of carbon monoxide poisoning, apparently the victim of a suicide, according to Perry County Coroner George Arche.

The body of Harry Lovelace, 67, Walkertown, was found slumped in the front seat of his car behind the commissary building of the Darfork Coal Co. at the Hazard city limits.

A rubber hose had been extended from the car's exhaust into a side window, State Police said.

Lovelace was first reported missing by his wife, according to State Police, at 5:45 this morning when she phoned State Police to tell them he was overdue from a trip to the Mine's Memorial Hospital where he had gone to get medicine for her cold.

Five minutes later, a second call from Mrs. Lovelace notified State Police that her husband's car had been seen by

Police Arrest Knott Man

A Knott County man was arrested Friday night by State Police, for selling alcoholic beverages in a local option territory.

Placed in the Knott County jail was Glenn Nelson, 37, of Lackey, following a 6 p.m. raid of the abandoned Lackey Hospital and restaurant at Lackey. State Police said the buildings are owned by Ed Napier, 55, of Lackey.

Charges against Nelson were brought by an unidentified State Policeman from an adjoining county after Nelson had sold the plainclothes trooper one-half pint of gin at 9 a.m., Friday.

The whiskey, found in an elevator shaft at the hospital, included 23 one-half pints of whiskey and wine, 128 quarts of beer, 137 sixteen ounce cans of beer and 46 twelve-ounce cans of beer.

Principal Speaker

Principal speaker for the M. C. Napier graduation tomorrow night at 6:30 p.m. will be J. B. Blalock, state representative, Woodmen of the World Life Insurance Society, A Mason, Shriner and member of the Million Dollar Round Table, Blalock is from Louisville.

Aid Payments Total \$197,000 For 3 Counties

Over \$197,000 was made in assistant payments through the Hazard office of the Department of Economic Security, according to a bulletin issued by the department this week.

A breakdown show payments of \$64,425 to Breathitt Counties; \$58,493 for Knott Counties; and \$74,205 for Perry Counties.

Aid to dependent children represented the largest block of money for all three counties: Perry, \$38,337; Breathitt, \$31,608; Knott, \$31,567. In the three counties, 1,242 adults and 4,022 children were receiving assistance under the aid for dependent children.

Old age assistance accounted for the second highest aid expenditure by the department with \$73,519 going to 2,094 persons during April. Breathitt, \$24,485 for 695 recipients; Knott, \$19,625 for 567; and Perry, \$29,436 for 832 recipients.

Aid to the needy blind for the three counties was \$11,080. Perry, \$3028 for 86 persons; Knott, 3,625 for 99 recipients; and Breathitt, \$4,427 for 121 recipients.

Business College Holds Graduation

The Hazard Business College held its graduating exercise Saturday evening in the Kentucky Power Company Auditorium.

Rev. William F. Pettus of the Bowman Memorial Methodist Church gave the invocation. The welcoming address was given by Mrs. Era Ferguson, director of the college.

Mr. C. A. Zoellers, Kentucky Power Company, was the principal speaker.

Mrs. Ferguson, assisted by Mr. Harold Collins, presented the diplomas and certificates.

Those receiving diplomas were: Miss Mildred Baker, Mrs. Artie Campbell, Mrs. Betsy Carter, Mrs. Patty Combs, Mrs. Colleen Everidge, Miss Betty Jane Lewis, Miss Cleda Nickoll, Mrs. Willa Parks, Miss Betsy Smith.

Those receiving certificates were: Miss Lula Combs, Mrs. Helen Daugherty, Mr. Billy Herley, Mrs. Betty Rose, Mrs. McElie Sizemore, Mrs. Gypsy Lee Smith, Mrs. J. Turner, and Mrs. Veda Watts.

Schools Give \$260 To Flood Fund

Perry County schools have contributed \$263.64 to the Floyd County School Bus Disaster Fund, County Judge J. A. Smith announced this morning.

The money, mailed last week, brings to \$2,169.11 the amount contributed by Perry Counties to the drive.

School contributions are as follows: Butterfield, \$10; Chavies, \$26.70; Glomaw, \$5; Fourseam, \$7.50; Livingston, \$30; Combs Grade, \$25; Georges Branch, \$1; Dunraven, \$5; county school board office, \$11.25; Williams Branch, \$7.25; Daisy, \$8.18; Robinson, \$30.56; Ivy Gap, \$4; Krypton, \$2; Blue Diamond, \$2; Jeff, \$3; Clear Fork, \$8.05; Browns Fork, \$5; Feb Fork, \$3; Solar, \$8; Cornett Hill, \$10.75; Combs Memorial, \$34.40; and Farler, \$16.00.

Hazard Man Coaches

FORT BENNING, Ga.—The Third U. S. Army Rifle Team champions for 1958, the 82nd Airborne Division Rifle Team from Fort Bragg, N.C., is shown at Fort Benning after winning the Commander's Rifle Team Championship Match Friday (April 25). Kneeling (left to right) are SP3 (Specialist Third Class) Terry Stone, Ashland, Ohio; M-Sgt. Howard Greene, Fort Bragg; M-Sgt. Jack W. Stevens, Fayetteville, N. C.; and SFC William E. Reitz, Avis, Pa. Standing (left to right) are 1st Lt. Eugene Madison, Fayetteville, team captain; SFC John D. Mercer, Riviera Beach, Fla.; SP3 Walter L. Cline, Tulsa, Okla.; SP3 Clayton L. Kauffman, Neb.; and SFC Roy H. Combs, Hazard, team coach.

Highlights Of The Mining Convention

Productivity Per Man

"Higher productivity per man and more efficient utilization of personnel and material is a necessity in this day of rising costs. We retain the belief that better illumination can be a powerful tool in attaining these goals," a representative of the United States Steel Corp. told those attending a mine safety forum of the American Mining Congress 1958 Coal Convention being held here today.

Robert R. Godard, electrical engineer with the coal division of the U. S. Steel Corp., told of experiments conducted in the field of mine lighting developments. The experiments dealt with fluorescent lighting fixtures within the mine at the Robena Mine, Green County, Pennsylvania. Godard pointed out that the installation of such lighting facilities were met with mixed emotions by the miners. He said that some of the men approved the use of such lighting underground while others were opposed to it because of excessive glare. Quoting the Superintendent of the Robena Mine, however, Godard said, "Complaints such as blind spots, glare, and temporarily reduced vision in moving in and out of lighted areas were encountered. However, I am pleased to say that these complaints have now almost completely stopped."

Godard said that thus far it has not been proven whether the advantages justify the additional cost.

Blasting Agents

Since their introduction in 1954, the use of blasting agents compounded of prilled fertilizer-grade ammonium nitrate and a small percent of carbonaceous fuel has become well established in strip-mining of coal. Robert L. Akre, a colliery official, said today at a session of the 1958 Coal Convention of the American Mining Congress here.

Akre, who is superintendent of drilling and blasting for Maumee Collieries Co., Terre Haute, Ind., reported that virtually every coal stripping operation is using, in some degree, prilled ammonium nitrate, either packed in water-resistant expandable plastic bags, in asphalt-laminated or polyethylene-lined burlap bags, or merely as a mixture prepared at the

borehole and poured down.

His company's original mixture included carbon black as the fuel material. Since then, Akre said, the firm has changed to liquid hydrocarbon oil, as work with this mixture has shown it to be a product with greater sensitivity, higher velocity, and consequently better blasting action and reliability.

During the past few months, he continued, experiments have convinced his company that for hard shooting conditions, particularly in the bottom of the hole, the maximum density obtainable with the ammonium nitrate fuel mixture is desirable although some sensitivity is lost.

Underground Equipment

The repair and maintenance of underground mining equipment was the subject of a paper given today by LaMar T. Lindsay, shop foreman for the Kaiser Steel Corporation's Sunnyside Coal Mines near Sunnyside, Utah, at a continuous mining session of the American Mining Congress 1958 Coal Convention being held here.

Lindsay said the coal mining equipment used by the company at its Sunnyside operations is required to work under the most difficult circumstances, which makes maintenance of the equipment exceedingly important. He said there were many roof failures in spite of extraordinary roof control measures. He also said the mining equipment is often required to work on steep grades—up to 20 percent.

The company operates ten continuous miners which are operated on a two-shift basis and average 250 tons of coal per shift. The machines are brought to the outside shop on the average of once a year, where they are completely torn down and vry part is given a complete overhaul. The overhaul of each costs in the neighborhood of \$17,000 to \$25,000.

Lindsay gave a step-by-step explanation of the system used by the company to assure that all equipment is in operating condition and said that the company also keeps an extensive supply of parts to assure that any disabled equipment can be readily put back into operation.

Designing A System

The problems encountered in designing a coal mining system to most efficiently use the full production potential of a continuous mining machine were discussed today at a continuous mining session of the American Mining Congress 1958 Coal Convention being held here, Jesse F. Core, vice-president of coal operations for the United States Steel Corp., Pittsburgh, Pa., presented the paper on the subject.

According to Core, coal operators and equipment manufacturers have been designing, building and perfecting continuous mining equipment since 1920. He said that although the equipment is not always as continuous as the name implies, the machine cuts and loads the coal in one operation without drilling and blasting. This has resulted, according to Core, in fewer accidents at the mine face, elimination of the hazards of handling explosives, improved roof conditions, a need for fewer men to reduction of roof falls and better over-all coal recovery.

He said the advent of the continuous machines had also produced varied mining plans. Among the factors to be considered in implementing such mining plans, Core listed training of section foremen and employees to the degree necessary for efficient execution of the plan, a concentration of work areas and focusing the attention of the mine management on improving mine face procedures.

Preparation Efficiency

"The efficiency of the modern coal preparation plants is reflected by the feed of raw coal to the plant. An even, uninterrupted flow of raw coal assures the operator with a consistent marketable product, less coal in the refuse, and more tons produced per man hour," William C. Laidlaw told those attending a strip mining session of the American Mining Congress 1958 Coal Convention being held here today. Laidlaw is production engineer for the Enos Coal Mining Company of Oakland City, Indiana.

Laidlaw said that when his company designed its present coal preparation plant a 1,000-ton raw coal storage hopper was incorporated with the pre-

paration plant to minimize delays. He said this storage was ample under the original expectations, but later additions and improvements increased the preparation plant capacity by 25 percent and the 1,000-ton storage hopper proved inadequate. The company then had to take steps to assure the even flow of raw coal. He said this could have been done by the acquisition of additional loading and haulage equipment at the mine or by increasing the storage facilities. The company compromised and increased storage capacity and improved haulage by replacing six tractor-trailer haulage units with three larger tractor-trailer haulage units.

According to Laidlaw, "it was felt that the raw coal storage would best translate the operations of all independent mining units into a continuous flow of coal to the preparation plant. The greater utilization of a smaller number of haulage units allows for quicker depreciation and retirement to take advantage of the rapid advancement in design of haulage trucks."

Coal Plant Efficiency

The improvement in overall efficiency of a coal preparation plant resulting from the upgrading of fine coal by both flotation and the removal of solids from recycled water was described today by M. C. Chang, research mineral engineer with the Crucible Steel Company of America of Pittsburgh. Mr. Chang was speaking at a coal preparation session of the American Mining Congress 1958 Coal Convention being held here.

Chang pointed out that problems faced by his company when the mining system at the Crucible Mine, located at Crucible, Pa., called for several changes in the coal preparation plant. Engineering design changes were made in the existing plant and some additional equipment was purchased to help solve the problems caused by an increase in the fine sizes being fed to the cleaning plant.

According to Chang, not only were the problems solved, but there was an improvement in coarse coal washing, a reduction in steam coal production and an improvement in overall product quality. He also said there was an improvement in coal uniformity and coal yield. The complete elimination of the need for a waste pond except for emergencies were

among some of the other benefits.

35-Ton Capacity Trucks

The use of 35-ton capacity trucks in hauling coal from strip mines in West Virginia was described today for those attending a strip mining session of the American Mining Congress 1958 Coal Convention being held here, Robert Bunch, partner in the Bunch Construction Company of Sharples, W. Va., said the big trucks are equipped with short wheel bases and hydraulic steering which is necessary in the short turning area within the strip.

The main haul road and the secondary roads are constructed so that the grades will be between 10 to 15 percent and never more than 18 percent if possible. The trucks are equipped with 10 large tires, which according to Bunch is sufficient to provide traction on slick or mud roads. He said the trucks are also equipped with air-assisted clutches with high capacity transmissions which provides easy shifting of the gears and enough power to keep the trucks rolling.

Pointing out some of the other advances in truck design for mines, Bunch said the trucks used in the mines of the company have 300 horsepower engines which provide ample power for the trucks to come back up the steep grades out of the mine.

European Coal Research

European nations have more than four times as many persons engaged in research and development work on coal than the United States has, a prominent coal research specialist declared today at the opening session of the 1958 Coal Convention of the American Mining Congress here.

Dr. A. A. Potter, president, Bituminous Coal Research, Inc., West Lafayette, Ind., said that more than 3,000 persons are now engaged in coal research in Western Europe, and there are believed to be more than 5,000 doing similar work in the U.S.S.R.

In this country, about \$17 million was expended for bituminous coal research during 1955, he continued. This compared with 1955 research expenditures of \$146 million by the petroleum industry and \$361 million by the chemical industry.

Potter said his organization will study technical aspects and economics of handling small amounts of coal pneumatically, as well as pneumatic ash handling. New knowledge is also needed regarding the practicability and market potential of large warm-air, coal-burning units and principles for coal burning in small plants.

For coal to participate fully in the ever-increasing energy demand of this country and of the world, vigorous coal research and development programs must be developed and carried out, Potter emphasized.

Rock Dusting

"Every advance in productivity which is achieved by engineering genius must, at least, be matched by safety engineering and protective procedures in the mines and cleaning plants if we are to avoid coal dust explosions," C. E. Linkous, director of safety for the Island Creek Coal Co., of Holden, West Virginia told those attending a coal mine safety meeting of the American Mining Congress 1958 Coal Convention being held here today.

Speaking on rock dusting of mines in multiple shift operations, Linkous said the first objective of rock dusting is to render the coal dust inert so that it will not explode in the event it is accidentally thrown into the presence of an igniting agent. He said

THE HAZARD HERALD, HAZARD, KENTUCKY
Monday, May 12, 1958

the motive is to reduce or eliminate entirely the possibility of an explosion which would take the lives of many valued employees and also to comply with State and Federal laws.

Linkous said the application of rock dust must be scheduled precisely and no interruptions can be permitted to cause a departure from or neglect of the pre-arranged schedule and that this required continuous checks by the personnel of the company safety department to assure that the rock dusting is adequate as to quality, quantity and timing of application. He also pointed out that provision must be made for adequate machinery for the rock dusting, for adequate crews to conduct the work and that ample supplies of the rock dust must be available at convenient locations throughout the mine.

Solids In Water

Control of the amount of solids in the circulating water used in coal preparation plants constitutes one of the major problems of such coal preparation plants, J. J. Reilly today told those attending a coal preparation session of the American Mining Congress 1958 Coal Convention being held here. Reilly is the coal preparation superintendent of the Vesta-Shannon Coal Division of Jones & Laughlin Steel Corp. of California, Pa.

Reilly said the solids are allowed to build up within the circulating water system, the entire circuit gets out of con-

trol and the uniformity and quality of the product are adversely affected. He said the control of the solids in the water will vary from plant to plant due to the coal seam conditions within the mine, the methods of mining and the type of equipment used. The end use of which the coal will be put, according to Reilly, determines how extensive the control of the solids must be. If a high grade, uniform coal is needed, greater control must be maintained over the washing system.

"We, at the Vesta-Shannon Coal Division of Jones & Laughlin Steel Corporation feel that solids control is necessary, and that the operator can minimize the problem of degradation by operating with a low percentage of solids in the circulating water, thus avoiding recirculation degradation," Reilly said.

Thermal Drying

Thermal drying equipment manufacturers are endeavoring to provide the coal industry with low maintenance, highly efficient equipment to help mine operators better satisfy their customers, F. R. Zachar, consulting mining engineer of Morgantown, W. Va., told those attending a coal preparation session of the American Mining Congress 1958 Coal Convention being held here today.

They made bourbon to please themselves-and pleased everyone!

You, too, will appreciate the superb taste and Kentucky quality of the magnificent bourbon created by William Bond and C. C. Lillard in 1869.

SHERIFF'S SALE

PERRY CIRCUIT COURT

LEWIS KEPLER HYDE, JR. AND WILLIAM EMORY HYDE, EXECUTORS OF THE ESTATE OF LEWIS K. HYDE, DECEASED.

PLAINTIFF

vs: SHERIFF'S SALE

RIVERSIDE COAL AND TIMBER COMPANY

DEFENDANT

By virtue of execution No. 2006, to me directed, which issued from the office of the Clerk of the Perry Circuit Court in favor of Lewis Kepler Hyde, Jr., et al and against Riverside Coal & Timber Co., I will on the 19th day of May, 1958, it being county court day, at the court house door in the City of Hazard, expose to public sale to the highest and best bidder, a tract of land, lying and being in Perry County, Kentucky and more particularly bounded and described as follows:

TRACT No.	NAME	ACREAGE	LOCATION	DATE OF ORIGINAL DEED RIVERSIDE C. & T. CO.	RESERVATIONS & EXCEPTIONS GRANTORS (ACRES)
1 boundary	1 W. M. Cornett	(987.00	Big Leatherwood	9-23-1912 recorded	26 — 596 None

Explanation of Riverside Coal and Timber Company's ownership in the above tracts which are to be conveyed and transferred to the Executors of Louis K. Hyde Estate.

Tracts No. 1 through No. 7 inclusive—Fee Simple; with the exception of the oil and gas and the customary rights pertaining thereto as set forth in a Deed of Conveyance from Riverside Coal and Timber Company to the Kentucky West Virginia Gas Company dated November 8, 1940, and recorded in Deed Book 75, Page 344. (Note Tract No. 5—Original Deed calls for 13.00 acres from which Riverside Coal and Timber Company deeded 4.59 acres to the Louisville and Nashville Railroad Company in March of 1949.)

Tracts No. 8 through No. 17 inclusive—All Coal and All Other Minerals and the customary rights pertaining thereto; with the exception of the Oil and gas and the customary rights pertaining thereto as set forth in a Deed of Conveyance from Riverside Coal and Timber Company to the Kentucky West Virginia Gas Company dated November 8, 1940, and recorded in Deed Book 75, Page 344. (Note Tracts No. 8 to No. 11 inclusive. Surface and Surface Rights sold to Asbel Cornett by Deed dated June 9, 1955.)

I will proceed to sell said land, or so much of it as will be necessary to satisfy said execution, and costs, there of to the highest and best bidder, on a credit of six months from day of sale, the purchaser giving bond with approved surety, to have the force and effect of judgment on which execution may issue if the same is not paid at maturity, when and where due attendance will be given by me.

Amount to be raised, \$1,041.74 plus interest and Court costs.

PAUL AMIS
Sheriff of Perry County.

HAZARD'S FINEST

COUNTY AGENTS MEMO

Sawdust Is Most Valuable For Garden Mulch

Paul Keen, County Agricultural Extension Agent
John Caudill, Associate County Agent

This poem below sent in by Dr. Clyde C. Singletary, gives us something to think about. Think it over!

A POINT OF VIEW

A man lived by the side of a road and sold hotdogs. He was hard of hearing so he had no radio. He had trouble with his eyes so he read no newspapers. But he sold good hotdogs. He put up signs on the highway telling how good they were.

He stood by the road and cried, "Buy a hotdog, Mister!" and people bought. He increased his meat and bun orders. He bought a bigger store to take care of his trade. He got his son from College to help him. But then something happened. His son said, "Father, haven't you been listening to the radio, There's a depression on."

"The European situation is terrible. The domestic situation is worse." Whereupon the father thought, "Well, my son's been to college, he reads the papers, and listens to the radio and he ought to know."

He took down his advertising signs, And no longer bothered to stand out on the highway to sell hotdogs. And his hotdog sales fell almost over night. "You're right son," the father said to the boy, "We certainly are in the middle of a great depression."

WHAT? NO GARDEN?

The percentage of the farm family dollar for food has changed considerably in recent years. Farm families eat out more and, like city families, they buy more of the convenient processed and semi-processed foods. This means that less food is home produced now than formerly. The trend away from the production of fruits and vegetables for the home has both good and bad aspects. Eating out may permit a more varied contact with the community and that is good. At the same time, the quality of food consumed when one eats out can rarely compare with that of the fresh products from the garden. So for day-to-day good eating, a garden is almost a must. At present prices, the cost of store produce is high enough to limit the amount purchased. Thus the family and the children in particular may

Scouts To Hold Ary Camporee

Boy Scouts of the Kentucky River District will hold their annual spring camporee, May 30 and 31, at the Black Pine Camp at Ary.

All scouts and adult leaders from Perry, Knott, Breathitt, Leslie and part of Letcher counties are to attend. Camping, outdoor cooking, scouting skill contests, a court of honor and camp fire ceremonies are to be featured. Parents and friends of scouts are invited. Friday night, at 6:30 p.m. for the court of honor and a dinner served by the Scouts.

not be getting the quantity of fresh fruits and vegetables needed to maintain good health. It would be well worth-while to take a good look at the garden problem. How much is it worth in better living and how much in dollars and cents?

USE OF SAWDUST MULCH

If you want the luxury of a garden full of tender juicy vegetables use sawdust. Hundreds of home gardeners have used sawdust to help keep the soil moist and help make weeds easy to control.

Have no fears that sawdust will make your soil acid, or poison your plants. It won't! Sawdust is most valuable when used as a one-inch mulch in your garden, or around rose bushes or shrubs. The mulch conserves soil moisture, helps reduce weed growth, makes it possible to harvest vegetables or flowers immediately after a rain, and adds organic matter to the soil when plowed down. Tests plots maintained at the Horticultural Farm in Blacksburg, Va. since 1953 to determine the effect of sawdust mulch and clean cultivation as follows:

Snap beans yielded 10,350 lbs. per acre when clean cultivated and 13,410 lbs. where a sawdust mulch or an increase of 29.6% where a sawdust mulch was used.

Yields of cabbage increased 12%, cucumbers 33.2%, potatoes 30.7%, sweet corn 19.3%, and tomatoes 62.4% where sawdust mulch was used as compared to similar plots clean cultivated.

Sawdust can be easily obtained and can be very profitably used locally. We will discuss next week how to use sawdust as a mulch, fertilizer for gardens, and also special uses of sawdust on roses, shrub and berry bushes.

Big Sandy Indians

The Big Sandy Valley in Eastern Kentucky was the last section of the Commonwealth to experience Indian raids.

Selection of Mine Cars

The selection of mine cars for the underground haulage of coal was discussed today at a mine haulage session of the American Mining Congress 1958 Coal Convention being held here. E. M. Pace, general superintendent of the Inland Steel Company mines at Wheelwright, explained how and why his company had replaced existing mine cars with newer models.

Pace said the switchover to the newer cars was made after many factors were taken into consideration. He said these were the life of the mines, the amount of old workings, distances, tonnages, speed and size of trips, weighing and dumping facilities, power requirements, basic mining plans, size and design of cars, capital investment required and anticipated realizations from making the change. He said the major items of cost which received close scrutiny were the new car investment, head house conversion, automatic couplers for locomotives, installing new larger radius turnouts and making additional clearances.

He said his company, after four years of experience with the new cars, has found a 33 percent reduction in haulage costs and a five percent reduction in overall mining costs. He said at current savings, the company investment will be returned in from 2½ to three years.

Continuous Mining

Performance standards for continuous coal mining equipment was described today for those attending the American Mining Congress 1958 Coal Convention being held here. D. C. Howe, superintendent of Vesta No. 5 Mine, Vesta-Shannon Coal Division of Jones & Laughlin Steel Corp. of California, Pennsylvania was the speaker.

Howe said that in order to establish such performance standards it is first necessary to standardize the mining methods, the mining plans, the equipment to be utilized, and to gain a large measure of control over maintenance. He said each area presents its own problems, and too often a procedure that solves one particular problem may create difficulties elsewhere. "Infrequently there may be a choice of procedure, each alternative enough to merit consideration. Coal mining, however, seldom enjoys this pleasant atmosphere being subject to the dictates of safety, the law, and cost-demand factors," Howe said.

According to Howe, basic performance standards must be adjusted to fit existing conditions for each individual section of the mine. He said the matter

Honor Student Enters School

Miss Bobbie Sue Hylton, senior of Carr Creek High School, winner of the Kentucky Hospital Association Essay Contest in the Eastern Hospital Conference, has chosen to enter the Good Samaritan Hospital School of Nursing this fall.

Miss Hylton, as a result of winning this essay contest, received a \$25.00 Savings Bond at the Kentucky Hospital Association Convention in Louisville recently and is being awarded a three-year scholarship at the Good Samaritan Hospital School of Nursing.

Miss Hylton is the daughter of Mr. and Mrs. Frank Hylton of Cody, and has wanted to be a Registered Nurse ever since she was a small child. Miss Hylton will graduate from the Carr Creek High School in May and plans to enroll in the Good Samaritan Hospital School of Nursing this fall.

Vicco Soldier Completes Course

DEXHEIM, Germany (AHTN)—Pvt. Sherman C. Roberts, 19, son of Mr. and Mrs. Chester Roberts, Vicco, Ky., recently participated in a bridge building exercise with the 12th Engineer Battalion in Germany. A combat construction specialist in the battalion's Company E, Roberts entered the Army in July 1957, completed basic training at Fort Riley, Kan., and arrived in Europe last February.

Local UK Student Elected To Office

Clarence Ellington, a University of Kentucky junior from Jeff, recently was elected vice-president of Beta Alpha P.I., national accounting fraternity, at the University. Ellington is a son of Clarence Ellington Sr., and is a graduate of Vicco High School. He is a student in the UK College of Commerce.

Ironmaster Town

Russell, named for John Russell of Ashland, one of the region's former ironmasters, lies directly opposite Ironton, Ohio, and is connected to that city by a highway bridge.

of adjustment can be complicated and can arouse dissension because it is a matter of opinion, but if the methods and ratings used to set the standards are kept as simple as possible and are understood by the workers, any program based on performance standards has a much better chance of succeeding.

County Disabled May Lose Benefits If Application Not Prepared By July

Some of the disabled persons in this county who have been disabled a long time and have not filed disability applications may forfeit their right to future benefits for themselves and their families unless they contact the social security office before July 1, this year, according to Fred Little, Field Representative of the Hazard social security office.

Little pointed out that the social security law provides for monthly benefits for persons between ages 50 and 65 who have worked under social security for a specified period of time and who are severely disabled and are not able to engage in any substantial gainful activity.

Disabled workers under 50 years of age are not entitled to monthly disability benefits, but they may have their earnings records frozen to protect their future right to benefits. It was explained that by "freezing" an earnings record, the period of unemployment caused by disability will be disregarded in figuring the amount of any future benefit.

Since the amount of social security benefits is based on the worker's average monthly earnings, the "freezing" of a future

account is an important step in protecting that account. Unless the earnings record is frozen the period a person is disabled and has little or no earnings can result in reduced benefits for the worker, reduced benefits for his family in the event of his death, or can result in the complete loss of his benefit rights.

It was explained that if an application for a disability freeze is filed before July 1 of this year an earnings record may be frozen as of the time the disability began if certain work requirements are met at that time.

However, if the application is filed after June 30, 1958 the social security account may be frozen for a period beginning no earlier than one year before the date the application is filed.

Therefore, all persons whose disability has prevented them from engaging in substantial gainful work for the past several years should get in touch with their social security office before July 1, or they may lose their social security disability protection and also their security benefits is based on rights to any old-age or survivor's average monthly earnings, the "freezing" of a future

Asthma Formula Prescribed Most By Doctors—Available Now Without Prescription

Stops Attacks in Minutes... Relief Lasts for Hours!
New York, N. Y. (Special)—The asthma formula prescribed more than any other by doctors for their private patients is now available to asthma sufferers without prescription. Medical tests proved this formula stops asthma attacks in minutes and gives hours of freedom from recurrence of painful asthma spasms. This formula is so effective that it is the physician's leading asthma prescription—safe that now it can be sold "without prescription" in tiny tablets called Primatene.

Primatene opens bronchial tubes, loosens mucous congestion, relieves asthmatic nervous tension. All this without taking painful injections. The secret—Primatene combines 8 medicines (in full prescription strength) found most effective in combination for asthma distress. Each performs a special purpose. So look forward to sleep at night and freedom from asthma spasms. Only get Primatene, at any drugstore. Only 98¢—money-back-guarantee.

How to assure
 income **TIMED** to
 your family's needs
 from year to year!

Your family can have a monthly income during their 20 critical "growing-up" years—if you're not there to support them—through New York Life's Family Income feature.

By paying a small additional premium, this feature can be attached to most New York Life policies when issued. If you die within 20 years from the date your policy is issued, a monthly income of either \$10 or \$20 per \$1000 of your policy's face amount, depending on which one you have selected, would be paid to your family for the months and years of the period remaining. Then, the basic policy's face amount would be paid!

If you live, you stop paying the additional premium after the 20th year and still retain your life insurance. Contact me for details.

Coal Show Queens

Miss Peggy Lee Tolley, of Mullens, standing, center, will reign over the 1958 Bluefield Coal Show as Queen Bituminous XIV. Her attendants are, seated left to right, Miss Carol Todd of Coalwood, Miss Nancy Hughes of Pageton, Miss Sarita Matney of Baileyville, and Miss Wanda Lou Stout of Bluefield.

"Excellent" Nutrition Program Being Conducted At Lower Broadway School

Margaret Fouts
 State Department Health
 An excellent nutrition program has been going on at Lower Broadway School this year.

In some rooms, milk clubs were started to encourage the children to drink milk. This milk being available at \$3.03 a bottle under the Government Special Milk Program.

Some classrooms had special breakfast programs to emphasize the importance of starting the day with enough fuel to last until the noon meal.

All classrooms encouraged milk for recess instead of poor snack foods which would tend to take the place of the noon meal and furnish nothing but calories in the diet.

The School Lunch Program has done its part by helping make the School Lunch Room a laboratory for learning about good food.

In one room, the boys and girls learned how to plan a good, well-balanced meal by studying the Basic Seven foods, analyzing their school lunch menus and making their own menus from food pictures in magazines. Some parents reported that the children re-

minded them when their meals at home were "too starchy." The main objective of these classroom activities is to build and keep good food habits. We know that children cannot learn what they are in poor condition nutritionally. We know, too, that the food we eat affects the way we look, feel and act.

Often we eat only a few foods over and over again which may cheat us of some of the nutrients we need. When we eat a wide variety of foods including meat, milk, vegetables, fruits, breads and cereals and butter, we are more likely to feel and look our best.

We hope that this program will continue and grow this coming school year. Everyone benefits when our children are healthy—the child, the school, and the home.

Greenup's New Name
 County, was named for the th Greenup, seat of Greenup County, was named for Christopher Greenup, governor of Kentucky (1804-1808). The town was known as Greensburg until 1872 when the name was changed to avoid confusion with Greensburg in Green County.

VICCO

Cornett Remodeling Home In Vicco

Don Noble

Sid Cornett is remodeling his home in Vicco.

J. D. Mullins and others, of Irishman, are in Vicco on business.

Mr. and Mrs. Dan Noble of Vicco were visitors of Mr. and Mrs. George Fugate Monday at Talcum. It was Mrs. Fugate's birthday. She is a sister of Mrs. Dan Noble.

The Game Warden, Mr. John Fugate says there are plenty of fish on Balls Fork. Willie Dixon and Tom Noble of Vicco and Sassafras went to Spring Lake Saturday fishing but had no luck. The worms were too long to get them on their hooks.

Preacher Jim Dixon and wife of Combs, visited their daughter last week. Mrs. Glades Browning at Vicco.

Mrs. Ben Back, of Vicco, left for Blackey Sunday to stay with her mother while she is sick.

George Everage, of Sassafras, would like very much to know the Pranskers who pulled up his cabbage plants.

Mrs. Jim Shively, of Vicco, is in the Miners Memorial Hospital very sick.

Recipe of the Week

The month of May brings many occasions when a pretty dessert is an important part of the menu or refreshments. Delicacy of flavor and lightness have special appeal at such affairs, says Mrs. Lucille Warren, UK Extension foods specialist. Whether it is for a graduation party, wedding shower or birthday party, she suggests the following as a delightful choice.

Orange Refrigerator Cake

1 T unflavored gelatin
 1/4 c orange juice
 1/2 c sugar
 1/2 c hot water
 3/4 c orange juice
 12 large marshmallows
 1 c whipping cream
 Lady fingers or sponge cake
 1/2 c orange sections
 Soak gelatin in 1/4 cup orange

juice and set over hot water until dissolved. Dissolve sugar in hot water, cool. Combine with dissolved gelatin and add remaining orange juice. When mixture begins to stiffen, beat with rotary beater until fluffy. Cut marshmallows in small pieces and add to mixture. Whisk 1/4 cup of cream and fold carefully into mixture.

Arrange lady fingers or slices of sponge cake on the bottom and sides of angel food cake pan. Fill with gelatin mixture and cover with lady fingers or sponge cake. Chill over night. Unmold and decorate with remainder of whipped cream slightly sweetened with powdered sugar and flavored with 1/4

Our Parent Company Has Changed Its Name to American Electric Power Company, INC. and we want you to know why

With a record of more than half a century of progress and service our parent company, American Gas and Electric Company, has adopted a new name: American Electric Power Company. The six company electric network, of which we are a part, will now be known as American Electric Power System.

Though we have changed names, we have not changed our business or made any other changes. We will continue to be an all-electric power system, with but a single service—providing economical, dependable electric power to our customers.

When the American Gas and Electric Company was formed in 1906, the founders provided for the development of gas as well as electrical facilities. They chose a name appropriate to the kind of business they foresaw, but almost from the beginning the company concentrated on developing a modern electric power system. Today it furnishes no gas service.

In 1906, electric power was still comparatively new; electric power systems, in the modern sense, were in the future. Today electricity is an essential tool in helping man better his environment in many ways: to build and manufacture, to entertain, to explore, to give his family comfort and conveniences in living undreamed of half a century ago, to fight famine and disease, and to control climate. Today the world stands on the threshold of new experiences, and electric power, as a result of harnessing the atom and other forces of nature, will be of even greater influence in expanding and enriching human activity.

We are proud that in our sphere of activity we have helped bring about some of these achievements of the past and of the present. We look forward with confidence to our part in helping to bring about through electric power the even greater achievements that can be expected in the future.

Local O.E.S. Members Visit Booneville

The Booneville Chapter, Order of the Eastern Star, entertained with a State Party for their distinguished member, Mrs. Marguerite Wilder, Grand Conductress of the Grand Chapter, Order of the Eastern Star of Kentucky.

The party was held in their Lodge Hall at Booneville on Friday night, May 9, at 7:30 Mrs. Wilder was honored by her Chapter with a "This Is Your Life" program and was presented with various gifts from the members and Chapters from her District in which Hazard is included.

Also in her honor the girls under her supervision at Buckhorn put on a program of Folk dancing which included Mrs. Wilder. Other music was furnished by a group of young ladies from Booneville. A skit, "Old Bags in Sacks" by members from a Lexington Chapter

was a highlight of the evening as well as another skit portraying the life of "Naomi" was put on by a Chapter from Louisville.

Grand officers attending this party were Mrs. Mae Mobayed, Ashland, Worthy Grand Matron and Mr. Mobayed; Mr. Johnny Sheitinger, Louisville, Associate Grand Patron and Mrs. Sheitinger; Mrs. Laura Porter, Grayson, Grand Esther and Mr. Porter; Mrs. Evelyn Dixon, Ashland, Grand Marshall and Mr. Dixon and daughter, Ann; Mr. G. P. Congleton, Beattyville, Grand Sentinel and Mrs. Congleton and members from various Chapter in District 6. Those going from the Hazard Chapter included Mrs. Pearl Combs, Deputy Grand Matron of District 6, Mrs. Jake Kimberlin, Worthy Matron of Elizabeth Chapter No. 145 and Mr. and Mrs. W. B. Campbell.

PERSONALS

Douglas W. Reynolds, son of Mr. and Mrs. Nim Reynolds, Hazard, is one of the outstanding students honored at Indiana University in Founder's Day ceremonies Wednesday, May 7.

Mr. and Mrs. L. L. Poates, of Rogersville, Tenn., were the weekend guests of their daughter, Mrs. William D. Gorman and family and attended the Mother of Good Council Kindergarten exercises in which their granddaughter, Mary Suzanne participated.

Miss Lula Hale, of Homeplace Hospital, Ary, was a business visitor in Hazard Saturday.

Miss Wilberta Ray Combs of Eastern State College spent the weekend with her parents, Mr. and Mrs. George W. Combs.

Mr. and Mrs. Herbert Charles and Mr. and Mrs. Henry Halford and daughter, Judy are vacationing in Fort Lauderdale, Fla.

Mrs. Robert Moranville and son have returned to their home in Lexington after visiting her mother, Mrs. Anna L. Boulos.

Mrs. Ray Henry and children, of Camp Campbell, have returned to their home after being the guests of her parents, Mr. and Mrs. Morgan Oze.

Mr. and Mrs. Jack West and son, Grant, are visiting Mr. and Mrs. Charles Watson in Fort Lauderdale, Fla. The Watsons are former residents of Hazard.

Mrs. V. B. Rogers has returned to her home after being confined in a hospital in Chattanooga, Tenn., for several weeks.

Easy Traffic Flow Noted In This Home

It does not matter how attractive a home is nor how spacious the rooms must have unrestricted access for a smooth traffic flow. When any room becomes a passageway you lose its main function and so decrease your living space. In this plan the front entrance provides a convenient approach to the kitchen, living room and the bedrooms. The homemaker will find the kitchen work center unusually well planned. The front-facing breakfast nook has breezeway access—this is another step-saving feature. Studying each area, one is impressed with the room arrangement. Each room

is spacious, living and dining rooms offer maximum living-dining comfort, while the lavatory and bath locations are most convenient. A built-in chest in the master bedroom; double linen closet in hall; towel cabinet in bath and book built-in in bedroom (which can serve as a study if desired), another built-in in the dining room are just a few of the features that will bring approval from prospective homeowners.

Trellis Adds Charm To House

A trellis will add charm to your house or garden in a variety of ways. You might build one to support a climbing rose above an unprotected front door, or over the gate leading to back yard or garden. Or you might build one over a quiet garden seat.

The pattern offered below outlines a simplified method of building your own trellis. Included is a list of materials needed as well as step-by-step directions for assembling them.

Send 50c cents in coin for Garden Trellis, Pattern No. 304 to Hazard Herald, P. O. Box 215, Pleasantville, New York. Send additional 35c for Catalog illustrating over 250 other Build it Yourself projects. Add 10c for First Class Mail and 10c for handling of payment is made by check.

New Fostoria Melamine

fine dinnerware with Fashion Flair... break resistant, too!

BLUE MEADOW brings you a traditional sprinkling of country flowers—arranged in the modern manner. Never before has break-resistant dinnerware been so beautiful, so smart.

Designed to go with your nice things, Fostoria Melmac® Quality Melamine is fade-proof, dishwasher-proof, even husband- and child-proof... unconditional

tionally guaranteed for one full year. 16-piece starter set (4 dinner plates, 4 cups, 4 saucers, 4 fruit/cereal bowls), or individual place settings. Open stock, including many serving pieces.

Mr. and Mrs. Sam Balleu, of Louisville, spent the weekend with her parents, Mr. and Mrs. Don Beams.

Mr. and Mrs. J. H. Denham have returned to their home in Lexington after attending the funeral of Mr. C. H. Combs on Sunday.

Mr. George W. Combs left this morning for Lexington where he will undergo medical treatment at the Central Baptist Hospital.

Lt. and Mrs. James P. Johnson and daughter Patricia Lynn have returned to their home in Columbus, Ga., after visiting Lt. Johnson's mother, Mrs. Cornelia Johnson and other relatives.

City Gets Funds

Planning funds of \$16,000 for 80 low rent homes have been authorized by the Public Housing Administration, Washington, D. C., for the City of Hazard, Senators John Sherman Cooper and Thruston Morton and Congressman Carl D. Perkins announced, Friday.

The planning money will be used to determine house designs, home sites and other likely costs.

Mr. Gene Parker spent the weekend with his mother, Mrs. V. D. Eubanks in Temple Hill.

Two Entertain Members Of Kindergarten Class

Mrs. Fred Vesco and Mrs. Ralph Bartlett entertained the members of Mrs. Bartlett's Kindergarten Class with a picnic on the Patio at Mrs. Vesco's on Friday, May 9. Hot dogs with all the trimmings and potato chips were served topped off with a birthday cake and coolade—all they could drink—since all the group will have their sixth birthday before entering school in September.

The class includes Freddie Jane Vesco, Maudella Nobis, Marjorie Smith, Dixie Carole Berry, Getha Helfenberger, Linden Fields, Tommy Watkins, Rickie Hobbs, Debra Feltner and Larry Johnson. Mrs. Lester Baker, driver of the Station Wagon was also a guest at their picnic. Various color balloons were enjoyed by the children.

Mrs. Hollon Entertains Church Circle

The Jean Back Circle of the First Baptist Church met at the home of Mrs. Alva Hollon Thursday morning, Mrs. George Tye Baker was in charge of the devotional, and program. Members present were Mrs. William Melton, Mrs. George Tye Baker, Mrs. Paul Petrey, Mrs. W. H. Hobbs, Jr., Mrs. Calvin Webb and Mrs. Joe Hacker.

Business Women's Circle Meet At Church

The Business Women's Circle of the First Baptist Church met in the dining room of the church Thursday evening for their regular monthly meeting. Mrs. Duard Hancock, leader presided at the business session. The program on "The Doors South" was given by Miss Esther Ritchie, Miss Leyburn Cody, Miss Virginia Bouris, Mrs. Ralph Peters, Mrs. J. O. Harper and Mrs. Duard Hancock. The devotional was given by Miss Helen Campbell. Refreshments were served by the hostesses, Miss Campbell, Mrs. Norman P. Cornett and Mrs. C. D. Whitley to the following members: Miss Leyburn Cody, Mrs. Howard Smith, Mrs. Elmyra Combs, Mrs. Ralph Peters, Miss Virginia Bouris, Mrs. George W. Combs, Mrs. Theora W. Grigsby, Mrs. J. O. Harper, Mrs. Charles Luttrell, Jr., Mrs. Duard Hancock and Mrs. Roland Baker.

Mrs. Marcum Honored At Dinner Party

The teachers of the Lothair School entertained with a dinner in honor of Mrs. Virgil Marcum on Monday evening at the home of Mrs. John D. Bowling. Mrs. Marcum who will leave soon to make her home in Naples, Fla., was presented with a gift. Miss Edna Ritchie of Viper entertained the guests with Mountain Ballads which she sung and pie yadethno t sung and played on the Dulcimer.

In addition to the honoree and Mrs. Bowling, guests present were Miss Virginia Cecil, Mrs. E. L. Burklow, Mrs. Forest Ewen, Mrs. Raleigh Hall, Mrs. Roscoe Sackelford, Miss Edna Ritchie, Mr. Elmer Bellamy, Mr. Roy G. Eversole and Mr. Paul Wright.

M.M.H. To Hold Interviews For Trainees

Applicants for practical nurse training at hospitals of the Miners Memorial Hospital Association will be interviewed within the next few weeks for the one-year course to begin on September 15, 1958, at Williamson, W. Va.

Dates for personal interviews and aptitude tests at the various hospitals follow: Williamson, W. Va., on May 27; Pikeville, Ky., on June 2 and 3; Wise, Va., on June 5 and 6; Harlan, Ky., on June 10 and 11; Williamson, W. Va., on June 13. All of the above tests will be held in the Miners Memorial Hospital Association hospitals.

Candidates (both men and women are eligible) must be present by 9 a.m. on the days set for interviews, and should

be prepared to spend several hours. Persons from 17 to 55 years may apply. Students are required to have a minimum of one year of high school or its equivalent to qualify for the courses. Good health and a desire to help care for the sick are additional requisites.

Board and room will be provided during the first four months of training and an education allowance will be granted during the last eight months. Classes and hospital practice make up an eight-hour day, five days a week. Students will be given three weeks vacation during the year.

The practical nurse training school will provide an opportunity for development of knowledge, aptitudes and skills

in bedside nursing. The students under supervision of licensed physicians and registered nurses especially qualified for such instruction, will learn to share in the care and rehabilitation of the sick as well as receive training in the prevention of illness.

LETTER FROM MRS. JOHN SHERMAN COOPER

Sulgrave Club Dinner Banked by Photographers

Last week we went to a dinner at The Sulgrave Club that is given once a year by all of the Republican Senators for themselves and their wives. This dinner, naturally, includes the Vice President as he is the head of the Senate and this time we had the honor of having both The President and Mrs. Eisenhower at our party. When we drove up to The Sulgrave Club it was banked by Secret Service men and photographers. Our taxi driver got very excited and said, "All this commotion isn't for you, is it?" We quickly assured him that it was not, and he said he was going to park his cab and join the crowd to wait for the Eisenhowers' arrival.

Everyone was assembled when The President and Mrs. Eisenhower came in, escorted by Senator Knowland who had been waiting for them at the door. The President looked marvelously well. As for Mrs. Eisenhower, it is practically impossible to believe that she is sixty years old. I have seen her much more often than I have the President and each time I am struck anew by her gaiety and youthful appearance. That night she looked particularly pretty in a blue and green chiffon evening dress with a scarf of the same material around her shoulders.

During dinner the orchestra played the different state songs and there were a lot of "yipses" and cheers when My Old Kentucky Home rang out. Then there were a series of skits and it is amazing how much musical talent there is in the GOP. The Vice President played the piano, Senator and Mrs. Bennett had written the words and music to a song that included the entire roll call of the Senate with comments on its members, and the surprise of the evening for me was that Senator Jenner turned into a mixture of Al Jolson and Bob Hope and kept everybody rocking with laughter. The President and Mrs. Eisenhower really seemed to enjoy themselves and Mrs. Eisenhower even said a few words to us when she was introduced which she ordinarily never does. The President made a wonderful little talk and we all went home feeling very happy and united.

Today, at noon, I left the Senate Ladies Red Cross class to attend the unveiling of the bust of Kentucky's beloved Al-

Three-Shot Treatment Needed On Strawberries

A three-shot treatment of insecticides is needed right now on strawberry fields, says J. G. Rodriguez, Kentucky Experiment Station entomologist.

The recommended treatment is for plants in the "early bloom" stage, he said. Insects to be protected against are the cat-facing bugs,

strawberry weevils, mites, aphids, crown borers and in some cases, the leaf-roller. A special insecticide is suggested for the leaf-rollers if strawberry raisers have experienced trouble with them previously.

Here are the materials:
DUST: A 5-percent Malathion dust, a 5-percent DDT dust and

a 7.5-percent Captan dust. Combine these three and apply at 40 pounds per acre. Generally the preparation sold commercially as "strawberry dusts" will contain Malathion and DDT in combination, Rodriguez said.

SPRAYS: Take 100 gallons of water and add the following to it in these proportions: Four pounds of 25-percent Malathion wettable powder; two pounds of 50-percent DDT wettable powder; and five pounds of 50-percent Captan wettable powder. This 100-gallon spray mixture will cover an acre.

The DDT and Malathion control insects; the Captan is a fungicide to control harvest rots, etc.

Civil Service Plans Exams

The Board of U. S. Civil Service Examiners, Lexington Signal Depot, Lexington, Ky., has announced an examination for the position of Cost Accountant, at the beginning salary of \$5,440 a year, to fill current vacancies at that installation.

Applicants will be rated on the basis of experience and training; a written test will be required for those who do not offer at least 24 semester hours in accounting subjects in a resident school above high school level.

Information and the necessary application forms may be obtained from the Commission's local representative, Mr. Sherman Jones, located at Hazard Ky. Postoffice building, Board of the Executive Secretary, Board of U. S. Civil Service Examiners, Lexington Signal Depot; or from the Director, Sixth U. S. [ing.]

Crawford Complete Ft. Gordon School

Pvt. Charles K. Crawford, son of Charlie Crawford, RR 1, Hazard, graduated recently from The Provost Marshal General's School, Ft. Gordon, Ga.

During eight weeks of military police training, Pvt. Charles K. Crawford received instruction in MP subjects such as traffic control, civil and military law, map reading, prisoner-of-war control and judo. He was inducted into the Army and completed basic infantry training at Fort Knox, before arriving at The PMG School to undergo MP training.

FALSE TEETH That Loosen Need Not Embarrass

Many wearers of false teeth have suffered real embarrassment because their plates dropped, slipped or wobbled at just the wrong time. Do not live in fear of this happening to you. Just sprinkle a little PASTERETH, the alkaline (non-salt) powder, on your plates. Hold false teeth more firmly, so they feel more comfortable. Does not sour. Checks "plate odor" (denture breath). Get PASTERETH at any drug counter.

BLUE CROSS FOR HOSPITAL CARE **BLUE SHIELD** FOR SURGICAL BENEFITS

ARE THERE TO HELP YOU

There's real security for all the family in knowing you can have help in meeting the unexpected hospital and doctor bills, most of us face sooner or later. Blue Cross and Blue Shield give the kind of reliable protection your whole family can count on.

ASK YOURSELF THESE TWO QUESTIONS:

- 1 Does the hospital-surgical plan you now carry decrease benefits at age 65 or older?
- 2 Will it cancel if you develop an incurable condition?

IF EITHER ANSWER IS "YES" YOU SHOULD APPLY FOR BLUE CROSS-BLUE SHIELD

HERE'S HOW YOU MAY APPLY:

GROUP: If there are 5 or more persons where you work, ask your employer about forming a Blue Cross-Blue Shield Group.

INDIVIDUAL OR FAMILY: If you are a Kentuckian, 65 or under and in good health, you may apply for Blue Cross-Blue Shield direct, regardless of employment. Just fill out and mail the handy coupon below.

HAZARD'S FINEST

Roscoe's Roundup

Boys, between your fishing plans and your garden planting plans. It would be hard to say what you should do next. These warm days makes your blood run both ways. That good woman of yours could no doubt make the best decision, dare say that she wouldn't say it is the best time to plant the garden.

This is the season of the year that it catches a man between a rock and a hard place. Sometimes I wonder if we couldn't change the seasons somewhat. Or maybe, change the minds of our better halves.

Arthur Bailey states that his good wife bought a grubbing hoe this spring. He decided it was the very thing to dig fishing worms with, as I understand it when he mentioned fishing worms, he had a ready reply, that there would not be any worms dug for fishing with her new hoe. Arthur had it all planned to use that hoe for cutting so many inches off the handle. Arthur, I am afraid that you will have to use that hoe for a more specific purpose than digging worms. Along in December or January, she might say, I told you so, because if you hadn't hoed those beans where would we have been today to enjoy these. Yes, follows a woman's mind is very hard to cope with.

FISH PLANTED

Already plans are being made for the Buckhorn Reservoir, fifteen hundred fish were planted in that area a few weeks ago. Many going as much as fourteen ounces. That is the Blue Gill Class, not bad size. Without a doubt they are the greatest fish in our waters for their size. I would say look out in a year from now that maybe a record could be set on the Buckhorn Reservoir. Other fish were also liberated at the same time. I predict that when the reservoir is finished, you will be able to have good fishing. A suggestion I would like to pass on to you fisherman, now would be a good time to study the banks that the water will cover, pick out your spots now. Be prepared when the lake fills. Don't say I didn't tell you so. Study the formations of the points and banks, draw yourself a map if you want to go into the really scientific way of fishing. I guess most of you are like myself, you are willing to find them as you find them. You enjoy the pleasure of being in the great outdoors. Fish I am sure would be cheaper at your local grocery.

But it is drawing to a close in regard to your membership to the Perry Fish and Game Club. Boys, why not mail your dollar in today, why not become a member of this organization? If you like to hunt or fish, I am sure that you could never invest in anything more worth while. You want I am sure better hunting and fishing in Eastern Ky. You are interested in seeing that our streams are kept clean and free of pollution. You are I know interested in seeing our forests being improved. Boys, it is all up to you that like the great outdoors, no one person can bring it about. It depends

up on all of you. Your sport depends upon the support that you are willing to give it some thought and time.

The editorial, a few weeks ago in regard to why Hazard didn't try to beautify the approaches to our city, with such items as trees and etc. I would like to inform the writer that your suggestion was a timely one. As it came on the verge of a month long clean up campaign. In regard to the trees and shrubbery that you mentioned. I want to tell you, that your Perry and Game Club, has secured many hundreds of plants of various types to plant. With the promised help of our city, along with our senior and junior garden clubs, along with other civic organization. I am sure that you will see something growing along our highways to the approaches of our town. After they are planted, won't each and every one take some responsibility in regard to keep them growing. As a suggestion, why can't all civic clubs, or maybe I should say why don't they start a year round program of planting shrubbery and trees that are suitable to the beautification of our County and City. I believe with the proper corporation of all interested that we could see this come true. It's our town and county we should all take some civic pride in helping make it a better and cleaner place to say I had a hand in helping to do it. Let's clean up our river banks, as well as our roads and streets. Our river can and will be one of the greatest assets we have.

CONGRATULATIONS

To all you loyal people that turned out for the meeting at City Hall Tuesday night, May 6. Which was in regard to keeping Robinson Forest as it now stands. You fellows really accomplished something that will go down in history as being one of the greatest moves our sportsmen has done for sometime. To all you people that came from surrounding counties such as Breathitt, Knott and others. You are to be commended for traveling here for this meeting in such weather. As I see Robinson Forest now we will be able to keep it. Boys, we are gradually waking up to the fact to the things we have in Eastern Ky. It only goes to prove, as long as you are determined to fight for what we have, then we will have it. So please bear this in mind in the future. Cooperation can make the old wagon wheel turn much faster, without using too much axle grease. So keeps this in mind.

WEATHER OR WETHER

To risk a fishing trip or not has plagued most of us all spring, not only for fishing, but in getting your gardens out. High water might do one thing for us that is bring us more fish up stream.

I sure am glad to see it going down. Of course all of you that was in last years flood know what I mean. Thanks to the good man above that we are so far out of the flood stage. Despite all the rain I have had several good reports of good catches of fish.

Bland Ballard, Pioneer, Hated Indians

By Charles F. Hinds

Bland Ballard came to the Kentucky frontier 12 years later than Boone, but few of the pioneers fought to clear the state of Indians as vigorously as did Ballard.

Daniel Boone could be peaceful and genuinely friendly with Indians. He killed them when it was impossible to do otherwise, but he never bragged about it. When questioned about Indians he had killed, Boone, according to those who knew him, replied in the following various ways: "As I was looking at the fellow, he tumbled into the river, and I saw him no more." "I heard a gun crack, and I thought it was mine." "Sounded like Tick-Licker (his favorite rifle now owned by the Kentucky Historical Society)." "They tumbled into the water, and I never saw them any more." "While I looked at them, they fell down and never crossed my path again."

Ballard, on the other hand, is reported to have boasted of having killed six Indians one morning before breakfast and then followed this statement with the apology that it wasn't a very good morning, however, for the business.

One morning while on scouting duty for George Rogers Clark, Ballard spotted a canoe on the Ohio River which contained three unsuspecting Indians. He killed them with professional-like precision, one by one. Another time, he shot an Indian, who had just scalped a camp guard. Not content with merely pursuing and killing the Indian, Ballard returned triumphantly to his friends, carrying in his hands both of the still-dripping scalps.

Once when his horse was stolen by three Indians, Ballard took a short cut and headed off the thieves. From ambush, the Indian riding the horse was shot, causing the frightened animal to bolt. Ballard leaped on the galloping horse as it went by and made good his escape.

In 1853 the old pioneer lay dying at the age of 92. An Indian came to his house, begging for food. Before Mrs. Ballard could persuade the Indian of the danger of his mission, the aged man suddenly raised himself out of bed, grabbed for his rifle, and shouted: "I smell an Indian."

Just as the unlucky redskin cleared the fence, Ballard got off his first shot, splitting the top rail, one of the few times in his life that Bland Ballard's aim was too low.

For Graduates Only: Seek Ye The Truth

This is the time of the year, have recorded only that which traditionally, for newspaper, orators and pseudo experts to This is the pattern of our educational system in Kentucky—tragic as it is. To your disadvantage the system has made "listeners" of you; instead of your mind has been taught to receive and obey—and never to question. You have been taught that 1 and 1 equals 2; that none of you know the reason why. You have been taught the rules of grammar, algebra, geometry and trig—accepting these in blind faith because they came from your teacher.

Bound by tradition, we ourselves are not beyond offering our thought for the day—for what's it worth to the graduates. And it is this: "As ye go forth in this world, plagued with troubles but glistening with opportunities," search for yourselves, take little for granted.

Be a skeptic? Yes—to the degree that you doubt what you already beyond repair. What you see you believe, never realizing that your eyes view only what your mind permits. Your ears hear only that which your mind allows to enter. You are already enrolled among the masses, a life that entitles you to much happiness, few responsibilities and even fewer opportunities to affect the future of society.

For those of you who can accept our advice on seeking the truth, the road is not an easy one. It can earn you the bitterness of friends, and the emptiness of loneliness. For questioning the actions and decisions of the great and near great, you are the freak in society. For doubting the values of tradition, the scorn of your fellowmen—men with the minds of the masses.

The road to truth is an impossible one if companionship, popularity and material success are your only goals in this world. It's only reward is the illuminating, inner glow of achievement that comes in knowing you have arrived at the truth.

As graduates, you can be likened to a photograph record. For most of you, your minds already enrolled among the

masses, a life that entitles you to much happiness, few responsibilities and even fewer opportunities to affect the future of society.

For those of you who can accept our advice on seeking the truth, the road is not an easy one. It can earn you the bitterness of friends, and the emptiness of loneliness. For questioning the actions and decisions of the great and near great, you are the freak in society. For doubting the values of tradition, the scorn of your fellowmen—men with the minds of the masses.

The road to truth is an impossible one if companionship, popularity and material success are your only goals in this world. It's only reward is the illuminating, inner glow of achievement that comes in knowing you have arrived at the truth.

Space Age Miracles To Come From Coal

CHICAGO, May 12 — The "barely predictable miracles" of the space age will be based on a surprisingly big increase in the use of 250-million-year-old bituminous coal, a coal executive said today.

Barton R. Gebhart, vice president of Freeman Coal Mining Corp., Chicago, said vast amounts of energy will be required in the decades ahead to make consumer goods as well as missiles, satellites and eventually space ships.

"And coal is the nation's most abundant source of energy," Mr. Gebhart said in a speech prepared for delivery to the National Association of Purchasing Agents. "The reserves of coal in the United States are enough to last many hundreds of years—long after the last drop of crude oil or whiff of natural gas has been squeezed out of reserves now known or suspected."

Electric utility experts predict that coal, not atomic energy, will increase its stature as their industry's predominant fuel by 1975, he said. Increased use of electricity for home heating duty, he said, "and it will need more use of coal by generating plants, he said."

Mr. Gebhart conceded that the coal industry faces some immediate problems in the competition from imported residual oil and from natural gas sold at "dump" rates as boiler fuel, the need for expanded research, and in high transportation costs. But he predicted that with public and Congressional support, coal will overcome these difficulties.

"Coal will weather this recession, and probably better than those before it," he said. "America needs its coal industry," he said, "and it will need it more with every passing year."

water, gas or electricity. In fact, the telephone is the only essential household utility that is so taxed."

The Hazard Herald

A friendly non-partisan newspaper published Mondays and Thursdays and dedicated to the firm principles of good news-gathering and endeavoring to maintain our sacred trust: Freedom of Press.

Member—The Kentucky Press Association and The National Editorial Association.

Entered as second class matter on Jan. 10, 1950, at Hazard, Kentucky, as required by the Act of Oct. 3, 1917, approved Oct. 3, 1917, authorized by the Act of March 3, 1879, and July 2, 1909. Mailing Address: P. O. Box 700, Hazard, Ky. Telephone: Main 114. Subscription Price (In County) \$4.00 Per Year. (Out of County) \$5.00 Per Year. W. F. NOLAN, Publisher. (By W. F. NOLAN, Jr.)

Grassroots Opinion

BROOKVILLE, PA., AMERICAN: "The great bulk of our foreign aid funds, over three-fourths, are spent in the United States. The mutual security program is estimated to account for the employment of some 600,000 American people. There is no 'giveaway' in this program, but there would be a 'giveaway' if we did not have it. We would have indeed 'given away' a dozen or so nations with their hundreds of millions of people. We would indeed have 'given away' the access which we and other nations have to essential resources. We would indeed have 'given away' essential bases. Worst of all, we would have 'given away' America's great spiritual heritage."

PINE BLUFF, ARK., COMMERCIAL: "From the Federal Government's viewpoint, the 10 per cent excise tax on all telephone service is a fine thing. But from most any other angle, it's an exceedingly bad tax. In the first place, it's discriminatory. There's no excise tax on

Transportation

Transportation of men, materials and coal within coal mines was described today for those attending a haulage session of the American Mining Congress 1958 Coal Convention being held here. C. Ward Padgett, general superintendent, Southern Illinois Division of Bell & Zoller Coal Co., told the group how the Bell & Zoller Company has solved the problem at the Buckhorn Mine near Johnston City, Ill.

Padgett said the company uses underground railroads for the transportation of men and supplies and uses conveyor belts for the transportation of the coal. "The arguments pro and con belt haulage, or track haulage, or a combination of both, can only be answered after an intensive study of the characteristics of the particular property in question," Padgett said.

Pointing out that at the Buckhorn mine men and materials must be transported three miles underground to the active working faces, Padgett said, "We have found that to transport men and materials this distance, it becomes necessary to have an adequate track haulage system. At Buckhorn, the utilization of both track and belt haulage has proved itself applicable to handling of coal and materials as well as the transportation of men to and from their working faces."

The speaker said that the maintenance of low costs in the handling of coal and the transportation of men and equipment within the mine as quickly as possible, is of the utmost importance the coal industry, that solving these problems varies from mine to mine, and no one system may provide the answer, but in combinations efficient underground transportation may be achieved.

Dean said that the trend in coal mining is for more and more production to be mechanized, emphasizing the need for equipment maintenance. He said that the heavy investment in mining equipment dictates that it must be kept operational at all times.

Speaking on the maintenance philosophy of his company, Dean said a routine check of equipment is not sufficient and that the making of such checks should be done by an individual whose responsibilities include the minimizing of delays and the selection or scheduling of equipment for overhaul. On preventive maintenance, Dean said the primary objective is to detect small defects or malfunctions of machinery and to see that they are corrected before they develop into major breakdowns. Periodic overhauls, according to Dean, should be based on inspection rather than on hours of work or tons of coal handled. He said this was because conditions throughout mines are not uniform and in most mines, equipment operates under varying conditions.

Israel Boone, son of Daniel Boone, was one of the men killed in the Battle of Blue Licks, August 19, 1782.

Sam Snead says: "You can't beat the Palm Beach Pro-Slak!"

For comfort, style, coolness!

Designed with the help of golf pros, the "Palm Beach" Pro-Slak is comfort-out for easy freedom of action... tailored of the world-famous, cool, wrinkle-resisting Palm Beach cloth. Preparation Costs

Means of reducing coal preparation costs through automation were discussed today at a coal preparation session of the American Mining Congress 1958 Coal Convention being held here. George H. Morris, preparation engineer of the Indiana Division of Peabody Coal Co. of Booneville, Ind., told the group that at three mines operated by his company automation had resulted in a reduction from 6 men to one in the work force to handle coal cars.

Talking on the Victoria, River King and River Queen mines of the company, Morris said that from 6,000 to 9,000 tons of coal were loaded at each mine per seven-hour and 15 minute shift with one man at each mine controlling all loading chute and car movements.

Describing each of the mines individually, Morris outlined the haulage equipment, the loading facilities and the means used to weigh the coal. He told how the equipment was selected to satisfy the peculiar requirements of each of the mines.

Maintenance

An effective mine equipment maintenance program must stress rigid inspection, preventive maintenance and scheduled overhaul. Ralph B. Dean, administrative assistant of the Lorado Coal Mining Co., Columbus, Ohio, told those attending a conventional mining session of the American Mining Congress 1958 Coal Convention being held here today.

SHERIFF'S SALE

PERRY CIRCUIT COURT

Tennessee Valley Authority Plaintiff

vs. SHERIFF'S SALE

Leslie Craft Defendant

By virtue of execution No. 2010, to me directed, which issued from the office of the Clerk of the Perry Circuit Court in favor of Tennessee Valley Authority, and against Leslie Craft, I will on the 2nd day of June, 1958, it being court day, at the court house door in the City of Hazard, expose to public sale to the highest and best bidder, a tract of land, lying and being in Perry County, Kentucky and more particularly bounded and described as follows:

Lying and being on Cedar Street and being Lots Nos. 9 and 10, in the City of Hazard, Perry County, Kentucky, and described as follows:

Beginning at a stake in the edge of Cedar Street in the corner of Lots No. 8 and 9; thence running with Cedar Street to the corner of Lot No. 11; thence up the hill with the line between Lots Nos. 10 and 11 to Jordan Street; thence with Jordan Street to the line of Lot No. 8; thence with the line between Lots Nos. 8 and 9 to Cedar Street, the place of beginning.

The same land conveyed to Clarence Leslie Craft from M. W. Ritchie, dated July 19, 1946, and recorded in Deed Book No. 88, page 473 and also the land conveyed to Clarence Leslie Craft and his wife, Nell Ruth Craft from E. H. McGuire and his wife, Eula May McGuire and Nora Campbell dated January 15, 1952, and recorded in Deed Book No. 103, at page 457, both deeds referred to above recorded in the Perry County Court Clerk's Office.

Two lots have been sold by Crafts, one to George C. Brooks, which is recorded in Deed Book 112, at page 109, and the other to Ernest Minnich, which is recorded in Deed Book 112, at page 110, records of the Perry County Court

No. 3 YOU CAN WIN CASH TO Better Your Living! ENTER \$125,000 "HOW'S YOUR HOME?" CONTEST!

HOW YOU CAN WIN: Grand Prize \$25,000.00. Second Prize \$10,000.00. Third Prize \$5,000.00. Plus 1,000 other cash awards totaling \$87,000.00! This is section 3 of the "How's Your Home?" contest. Three more sections will be published. Clip out each section as it appears and check each item. Follow instructions carefully. After section 6 has been completed mail it to Home Improvement Council, P. O. Box 810, Chicago 77, Illinois. The contest officially closes on June 30, 1958. Entries must be postmarked not later than midnight June 30, 1958 and received by July 15, 1958. One entry per family. One prize to a winning contestant. If you missed the announcement notice with the listing of contest rules, you can obtain it at the offices of this newspaper. If you have missed receiving any of the sections of this contest, you can obtain them at the offices of this newspaper.

Senator John Sherman Cooper and Mrs. Alben Barkley at last Tuesday's dedication ceremony in the Senate of the bust of former Vice President Barkley.

Mrs. Barkley unveiled the likeness of the beloved "Veep," executed in white marble by sculptor Kalervo Kallio. Senator Cooper, speaking at the impressive ceremony, said of Barkley: "The quality that made beloved was the fact that he never forgot the land and the people from which he sprang. Alben Barkley will always be closest to the hearts of the people of Kentucky. We say of him, 'He was a man. We shall not look upon his like again.'"

The new look in highways is here. Shown, a modern highway of sound-conditioned concrete

New-type, sound-conditioned concrete for your newest highways

Developed to meet the highway standards of 1975 Everything a good driver wants—a new-type concrete has. There's never a "thump." It's sound-conditioned. Laid continuously, this pavement has no joints... only tiny, almost invisible cushion spaces, sawed into the concrete. You skin over them and don't know it! This new-type concrete is laid flat—stays flat. It has a life expectancy of 50 years and more. Over 90% of America's most heavily travelled roads have been built of concrete. It's the preferred pavement for new primary roads.

PORTLAND CEMENT ASSOCIATION 885 Commonwealth Bldg., Louisville 2, Kentucky
A national organization to improve and extend the uses of concrete
